

MICHAEL COLIANNE

Consultant

“High quality,
cost-effective
Clinical
Engineering
programs are
a collaborative
effort of the
complete team”

Mike Colianne is a highly experienced leader and manager with over 40 years experience in the Clinical Engineering and Medical Device Service Management fields.

His expertise includes management at the account, District, and National level while working with OEM's, hospital systems, and Independent Service Providers.

Mike's professional experience has taken him to every corner of our country in support of medical device service teams. His proficiency includes:

- CE program and financial assessment and implementation
- Service Contract negotiation and administration
- Program cost analysis and control
- Team Building

Mike has enjoyed a highly successful career working with technical, clinical, and executive teams in hospital and business environments.
