

PATIENT TRANSPORT

Efficient transport of patients is essential to your hospital's patient flow and satisfaction. Soriant's team of experts can assist with improving throughput, increasing clinical productivity and reducing costs per trip. By reducing wait times and increasing the number of transport trips completed, you can immediately impact patient and staff satisfaction.

Partnering with Soriant will provide you with a top-to-bottom analysis of current productivity structures, knowledge of available patient flow technology and will identify attainable goals. We believe that continued patient flow improvements, the utilization of appropriate technology and human factors need to be considered concurrently in order to eliminate manual steps and productivity limitations.

WORKING TOGETHER, WE ACHIEVE BOTTOM-LINE RESULTS WITH A FOCUS IN THESE AREAS:

- ▶ IMPROVING PATIENT FLOW MANAGEMENT AND DESIGN
- ▶ IDENTIFY TRANSPORT RELATED DELAYS AND ALLEVIATE CAUSES
- ▶ REDUCING ED LOS FOR ALL PATIENTS
- ▶ REDUCING ED PATIENTS LEAVING WITHOUT BEING SEEN
- ▶ IMPROVING BED TURNOVER
- ▶ INCREASING PATIENT SATISFACTION
- ▶ INCREASING LABOR EFFICIENCIES THROUGH BALANCED WORKFLOWS
- ▶ MANAGING THROUGHPUT PROCESSES
- ▶ RENEGOTIATING SERVICE CONTRACTS
- ▶ MANAGING RFP/RFI PROCESSES FOR MOVING TO NEW SERVICE PROVIDERS

Performance indicators such as bed turnover, ED throughput and inpatient flow are important to track consistently, allowing the hospital transport department to establish benchmarks for existing patient flow. These metrics provide immediate feedback on specific changes made to patient flow as the organization identifies different strategies.
